

BRIGHTWELL

Modular Touch Free Dispenser

Touch-free soap dispensing brings better hygiene to any environment and helps monitor the use by controlling the amount of soap. No electrical fitting is required, as each dispenser is economically operated by C size batteries. To ensure optimum cost savings, the device has a 'sleep mode' and a sensor that prevents accidental soap delivery.

FLOOR AND TABLE-TOP STAND DESIGNED FOR MODULAR TOUCH FREE DISPENSER

We are now selling a floor and a table-top stand for our Modular touch-free dispenser. The free-standing stations are making hand sanitiser available anywhere. This is great for the use in hospitals, surgeries, supermarkets and places with high traffic areas.

Please contact us to find out more or for a quotation.
